

### Rules on letting this property

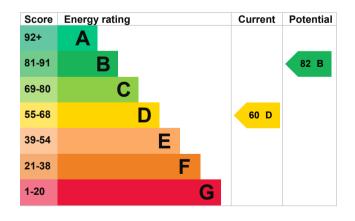

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance</u> for <u>landlords</u> on the <u>regulations</u> and <u>exemptions</u> (<a href="https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-quidance">https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-quidance</a>).

# **Energy rating and score**

This property's current energy rating is D. It has the potential to be B.

<u>See how to improve this property's energy efficiency.</u>

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

### Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	<b>Rating</b> Poor	
Wall	Cavity wall, as built, no insulation (assumed)		
Roof	Pitched, limited insulation (assumed)	Very poor	
Roof	Roof room(s), ceiling insulated	Average	
Window	Fully double glazed	Average	
Main heating	Boiler and radiators, mains gas Good		
Main heating control	Programmer, room thermostat and TRVs Good		
Hot water	From main system Good		
Lighting	Low energy lighting in all fixed outlets Very good		
Floor	Solid, no insulation (assumed) N/A		
Secondary heating	Room heaters, mains gas N/A		

### Primary energy use

The primary energy use for this property per year is 250 kilowatt hours per square metre (kWh/m2).

### Additional information

Additional information about this property:

Cavity fill is recommended

<b>Environmental</b>	impact	of	this
property			

This property's current environmental impact rating is E. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year. CO2 harms the environment.

An average household produces	6 tonnes of CO2
This property produces	5.3 tonnes of CO2

This property's potential 2.1 tonnes of CO2 production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

# Changes you could make

Step	Typical installation cost	Typical yearly saving
1. Room-in-roof insulation	£1,500 - £2,700	£137
2. Cavity wall insulation	£500 - £1,500	£86
3. Floor insulation (solid floor)	£4,000 - £6,000	£55
4. Solar water heating	£4,000 - £6,000	£38
5. Replacement glazing units	£1,000 - £1,400	£40
6. Solar photovoltaic panels	£3,500 - £5,500	£392

### Paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

# Estimated energy use and potential savings

Based on average energy costs when this EPC was created:

Estimated yearly energy cost for this property	£1054
Potential saving if you complete every step in order	£357

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

### Heating use in this property

Heating a property usually makes up the majority of energy costs.

# Estimated energy used to heat this property

Type of I	neating	Estimated energy used
Space he	eating	15983 kWh per year
Water he	eating	2746 kWh per year
Potential energy savings by installing insulation		savings by installing
Type of i	nsulation	Amount of energy saved

924 kWh per year

Cavity wall insulation 1816 kWh per year

### Saving energy in this property

Loft insulation

## Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
