Energy performance certificate (EPC)		
1 Chapel Lane Audley STOKE-ON-TRENT ST7 8JN	Energy rating	Valid until: 2 May 2032
Property type	Detached house	
Total floor area		71 square metres

Rules on letting this property

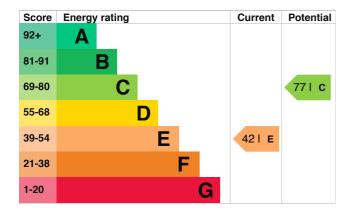

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlordguidance).

Energy efficiency rating for this property

This property's current energy rating is E. It has the potential to be C.

<u>See how to improve this property's energy</u> performance.

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Roof	Pitched, no insulation (assumed)	Very poor
Roof	Flat, limited insulation (assumed)	Very poor
Window	Mostly double glazing	Good
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in 44% of fixed outlets	Average
Floor	Suspended, no insulation (assumed)	N/A
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	Room heaters, electric	N/A

Primary energy use

The primary energy use for this property per year is 462 kilowatt hours per square metre (kWh/m2).

This property produces	5.7 tonnes of CO2
This property's potential production	2.2 tonnes of CO2
By making the <u>recommend</u> could reduce this property's 3.5 tonnes per year. This w environment.	s CO2 emissions by
Environmental impact ratin	as are based on
assumptions about average energy use. They may not consumed by the people live	e occupancy and reflect how energy is
	This property's potential production By making the <u>recommend</u> could reduce this property's 3.5 tonnes per year. This w environment. Environmental impact rating assumptions about average energy use. They may not

Improve this property's energy rating

Follow these steps to improve the energy rating and score.

Step	Typical installation cost	Typical yearly saving
1. Flat roof or sloping ceiling insulation	£850 - £1,500	£55
2. Internal or external wall insulation	£4,000 - £14,000	£373
3. Floor insulation (suspended floor)	£800 - £1,200	£44
4. Floor insulation (solid floor)	£4,000 - £6,000	£30
5. Low energy lighting	£25	£30
6. Solar water heating	£4,000 - £6,000	£24
7. Solar photovoltaic panels	£3,500 - £5,500	£341

Paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

Estimated energy use and potential savings

Based on average energy costs when this EPC was created:

Estimated yearly energy cost for this property	£1324
Potential saving if you complete every step in order	£555

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

Heating use in this property

Heating a property usually makes up the majority of energy costs.

Estimated energy used to heat this property		
Type of heating	Estimated energy used	
Space heating	18305 kWh per year	
Water heating	1987 kWh per year	
Potential energy savings by installing insulation		
Type of insulation	Amount of energy saved	
Loft insulation	2421 kWh per year	
Solid wall insulation	6752 kWh per year

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
