

# Energy performance certificate (EPC)

6 Abington Close  
CREWE  
CW1 3TL

Energy rating

D

Valid until:

13 September 2032

Certificate number:

6832-1321-7200-0327-0292

Property type

Detached house

Total floor area

80 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

# Energy rating and score

This property’s energy rating is D. It has the potential to be B.

[See how to improve this property’s energy efficiency.](#)

The graph shows this property’s current and potential energy rating.

**Properties get a rating from A (best) to G (worst) and a score.** The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D  
the average energy score is 60

---

## Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description                                 | Rating |
|----------------------|---------------------------------------------|--------|
| Wall                 | Cavity wall, as built, insulated (assumed)  | Good   |
| Roof                 | Pitched, 150 mm loft insulation             | Good   |
| Roof                 | Pitched, 250 mm loft insulation             | Good   |
| Window               | Fully double glazed                         | Good   |
| Main heating         | Boiler and radiators, mains gas             | Good   |
| Main heating control | Programmer, room thermostat and TRVs        | Good   |
| Hot water            | From main system                            | Good   |
| Lighting             | Low energy lighting in 64% of fixed outlets | Good   |
| Floor                | Solid, no insulation (assumed)              | N/A    |
| Secondary heating    | Room heaters, mains gas                     | N/A    |

### Primary energy use

The primary energy use for this property per year is 226 kilowatt hours per square metre (kWh/m<sup>2</sup>).

---

## How this affects your energy bills

An average household would need to spend **£719 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £105 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2022** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

---

### Heating this property

Estimated energy needed in this property is:

- 9,095 kWh per year for heating
  - 2,110 kWh per year for hot water
-

## Impact on the environment

This property's environmental impact rating is D. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year.

### Carbon emissions

|                                      |                               |
|--------------------------------------|-------------------------------|
| An average household produces        | 6 tonnes of CO <sub>2</sub>   |
| This property produces               | 3.2 tonnes of CO <sub>2</sub> |
| This property's potential production | 1.7 tonnes of CO <sub>2</sub> |

You could improve this property's CO<sub>2</sub> emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

---

## Steps you could take to save energy

| Step                              | Typical installation cost | Typical yearly saving |
|-----------------------------------|---------------------------|-----------------------|
| 1. Floor insulation (solid floor) | £4,000 - £6,000           | £53                   |
| 2. Low energy lighting            | £20                       | £23                   |
| 3. Solar water heating            | £4,000 - £6,000           | £28                   |
| 4. Solar photovoltaic panels      | £3,500 - £5,500           | £358                  |
