

# Energy performance certificate (EPC)

23, Bryn Wyndham Terrace  
Treherbert  
TREORCHY  
CF42 5NG

Energy rating

**D**

Valid until: **24 September 2029**

Certificate number: **8900-1255-3629-2926-2113**

## Property type

Mid-terrace house

## Total floor area

71 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

## Energy efficiency rating for this property

This property's current energy rating is D. It has the potential to be B.

[See how to improve this property's energy performance.](#)

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

### Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Sandstone or limestone, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, 150 mm loft insulation	Good

Feature	Description	Rating
Roof	Flat, no insulation (assumed)	Very poor
Window	Partial double glazing	Poor
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, no room thermostat	Very poor
Hot water	From main system	Good
Lighting	Low energy lighting in 89% of fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	None	N/A

## Primary energy use

The primary energy use for this property per year is 371 kilowatt hours per square metre (kWh/m<sup>2</sup>).

► [What is primary energy use?](#)

## Additional information

Additional information about this property:

- Stone walls present, not insulated
- Dwelling may be exposed to wind-driven rain

## Environmental impact of this property

This property's current environmental impact rating is D. It has the potential to be B.

Properties are rated in a scale from A to G based on how much carbon dioxide (CO<sub>2</sub>) they produce.

Properties with an A rating produce less CO<sub>2</sub> than G rated properties.

## An average household produces

6 tonnes of CO<sub>2</sub>

## This property produces

4.6 tonnes of CO<sub>2</sub>

## This property's potential production

1.8 tonnes of CO<sub>2</sub>

By making the [recommended changes](#), you could reduce this property's CO<sub>2</sub> emissions by 2.8 tonnes per year. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

## Improve this property's energy performance

By following our step by step recommendations you could reduce this property's energy use and potentially save money.

Carrying out these changes in order will improve the property's energy rating and score from D (63) to B (88).

▶ [Do I need to follow these steps in order?](#)

### Step 1: Flat roof or sloping ceiling insulation

#### Typical installation cost

£850 - £1,500

#### Typical yearly saving

£85

#### Potential rating after completing step 1

66 | D

### Step 2: Internal or external wall insulation

#### Typical installation cost

£4,000 - £14,000

#### Typical yearly saving

£67

#### Potential rating after completing steps 1 and 2

69 | C

### Step 3: Draught proofing

#### Typical installation cost

£80 - £120

#### Typical yearly saving

£29

#### Potential rating after completing steps 1 to 3

70 | C

## Step 4: Heating controls (room thermostat and TRVs)

Typical installation cost

£350 - £450

Typical yearly saving

£90

Potential rating after completing steps 1 to 4

73 | C

## Step 5: Solar water heating

Typical installation cost

£4,000 - £6,000

Typical yearly saving

£31

Potential rating after completing steps 1 to 5

74 | C

## Step 6: Double glazed windows

Replace single glazed windows with low-E double glazed windows

Typical installation cost

£3,300 - £6,500

Typical yearly saving

£44

Potential rating after completing steps 1 to 6

76 | C

## Step 7: Solar photovoltaic panels, 2.5 kWp

### Typical installation cost

£3,500 - £5,500

### Typical yearly saving

£315

### Potential rating after completing steps 1 to 7

88 | B

## Paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme \(https://www.gov.uk/guidance/check-if-you-may-be-eligible-for-the-boiler-upgrade-scheme-from-april-2022\)](https://www.gov.uk/guidance/check-if-you-may-be-eligible-for-the-boiler-upgrade-scheme-from-april-2022). This will help you buy a more efficient, low carbon heating system for this property.

### Estimated energy use and potential savings

Based on average energy costs when this EPC was created:

### Estimated yearly energy cost for this property

£975

### Potential saving if you complete every step in order

£346

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

## Heating use in this property

Heating a property usually makes up the majority of energy costs.

### Estimated energy used to heat this property

Type of heating	Estimated energy used
Space heating	14385 kWh per year
Water heating	2009 kWh per year

### Potential energy savings by installing insulation

Type of insulation	Amount of energy saved
Loft insulation	200 kWh per year
Cavity wall insulation	284 kWh per year

**Type of insulation****Amount of energy saved**

---

Solid wall insulation

1325 kWh per year

## Saving energy in this property

### Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
