

# Energy performance certificate (EPC)

28, Graig Park Avenue  
NEWPORT  
NP20 6HA

Energy rating

**D**

Valid until: **24 September 2028**

Certificate  
number: **8208-6721-7320-1485-4922**

## Property type

Semi-detached house

## Total floor area

74 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

## Energy rating and score

This property's current energy rating is D. It has the potential to be B.

[See how to improve this property's energy efficiency.](#)

Score	Energy rating	Current	Potential
92+	A		
81-91	B		82 B
69-80	C		
55-68	D	68 D	
39-54	E		
21-38	F		
1-20	G		

The graph shows this property's current and potential energy rating.

**Properties get a rating from A (best) to G (worst) and a score.** The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

## Breakdown of property's energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	System built, as built, no insulation (assumed)	Poor
Roof	Pitched, 200 mm loft insulation	Good
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in all fixed outlets	Very good

Feature	Description	Rating
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	None	N/A

## Primary energy use

The primary energy use for this property per year is 216 kilowatt hours per square metre (kWh/m<sup>2</sup>).

▶ [About primary energy use](#)

## Additional information

Additional information about this property:

- System build present

### How this affects your energy bills

An average household would need to spend **£635 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £54 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2018** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

---

## Heating this property

Estimated energy needed in this property is:

- 8,884 kWh per year for heating
- 1,825 kWh per year for hot water

### Impact on the environment

This property's current environmental impact rating is D. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year. CO<sub>2</sub> harms the environment.

## Carbon emissions

### An average household produces

6 tonnes of CO<sub>2</sub>

---

### This property produces

2.8 tonnes of CO<sub>2</sub>

---

### This property's potential production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

## Changes you could make

► [Do I need to follow these steps in order?](#)

---

### Step 1: Floor insulation (solid floor)

Typical installation cost

£4,000 - £6,000

---

Typical yearly saving

£25

---

Potential rating after completing step 1

69 C

---

### Step 2: Solar water heating

Typical installation cost

£4,000 - £6,000

---

Typical yearly saving

£29

---

Potential rating after completing steps 1 and 2

71 C

---

### Step 3: Solar photovoltaic panels, 2.5 kWp

Typical installation cost

£5,000 - £8,000

---

Typical yearly saving

£315

---

Potential rating after completing steps 1 to 3

82 B

---

# Help paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme \(https://www.gov.uk/apply-boiler-upgrade-scheme\)](https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

### Who to contact about this certificate

## Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

### Assessor's name

Nicholas Davies

---

### Telephone

0203 397 8220

---

### Email

[help@epconline.co.uk](mailto:help@epconline.co.uk)

---

## Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

### Accreditation scheme

Quidos Limited

---

### Assessor's ID

QUID205154

---

### Telephone

01225 667 570

---
