# Energy performance certificate (EPC)

4, Harcourt Street EBBW VALE NP23 6EN	Energy rating	Valid until:	6 August 2029
		Certificate number:	8291-6528-5590-8963-5902
<b>Property type</b> Mid-terrace house			

#### Total floor area

66 square metres

#### Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

#### Energy rating and score

This property's current energy rating is D. It has the potential to be B.

See how to improve this property's energy efficiency.

Score	Energy rating		Current	Potential
92+	Α			
81-91	B			88 B
69-80	С			
55-68	D		65 D	
39-54	E			
21-38		F		
1-20		G		

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

#### Breakdown of property's energy performance

# Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Granite or whinstone, as built, no insulation (assumed)	Very poor
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Roof	Pitched, 150 mm loft insulation	Good
Roof	Pitched, no insulation (assumed)	Very poor
Window	Fully double glazed	Good
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good

Feature	Description	Rating
Hot water	From main system	Good
Lighting	No low energy lighting	Very poor
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	None	N/A

#### Primary energy use

The primary energy use for this property per year is 291 kilowatt hours per square metre (kWh/m2).

About primary energy use

# **Additional information**

Additional information about this property:

- Stone walls present, not insulated
- Dwelling may be exposed to wind-driven rain

#### How this affects your energy bills

An average household would need to spend **£760 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could save £242 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2019** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

# Heating this property

Estimated energy needed in this property is:

- 10,423 kWh per year for heating
- 1,878 kWh per year for hot water

#### Impact on the environment

This property's current environmental impact rating is D. It has the potential to be B.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year. CO2 harms the environment.

# **Carbon emissions**

#### An average household produces

6 tonnes of CO2

#### This property's potential production

1.2 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Do I need to follow these steps in order?

# Step 1: Flat roof or sloping ceiling insulation

Typical installation cost	£850 - £1,500
Typical yearly saving	£24
	£24
Potential rating after completing step 1	
	66 D
Step 2: Internal or external wall insulation	
Typical installation cost	
	£4,000 - £14,000
Typical yearly saving	£147
Potential rating after completing steps 1 and 2	
	73 C
Step 3: Low energy lighting	
Typical installation cost	£40
Typical yearly saving	
	£46
Potential rating after completing steps 1 to 3	
	74 C

# Step 4: Solar water heating

# Typical installation cost £4,000 - £6,000 Typical yearly saving £27 Potential rating after completing steps 1 to 4 76 C Step 5: Solar photovoltaic panels, 2.5 kWp 76 C Typical installation cost £3,500 - £5,500 Typical yearly saving £314 Potential rating after completing steps 1 to 5 5

# Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

88 B

Who to contact about this certificate

# Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

#### Assessor's name

Tyrone Goodland

#### Telephone

#### Email tgoodland@tiscali.co.uk

# Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

# Accreditation scheme

Elmhurst Energy Systems Ltd

# Assessor's ID

EES/004367

#### Telephone

01455 883 250

#### Email
