# Rules on letting this property

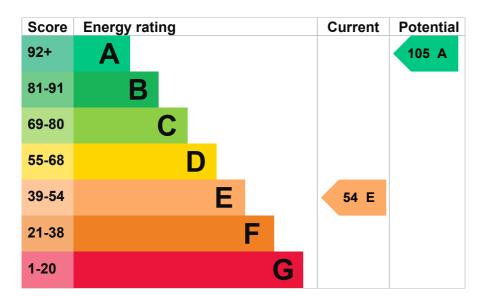

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

# **Energy rating and score**

This property's energy rating is E. It has the potential to be A.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

# Breakdown of property's energy performance

#### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, 100 mm loft insulation	Average
Window	Fully double glazed	Average
Main heating	Boiler and radiators, coal	Average
Main heating control	No time or thermostatic control of room temperature	Very poor
Hot water	From main system, no cylinder thermostat	Poor
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	None	N/A

#### Primary energy use

The primary energy use for this property per year is 308 kilowatt hours per square metre (kWh/m2).

About primary energy use

## How this affects your energy bills

An average household would need to spend £1,063 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £405 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2021** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

### Heating this property

Estimated energy needed in this property is:

- 10,153 kWh per year for heating
- 3,277 kWh per year for hot water

## Impact on the environment

This property's environmental impact rating is  ${\sf F}$ . It has the potential to be  ${\sf D}$ .

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

#### **Carbon emissions**

An average household produces	6 tonnes of CO2
This property produces	8.3 tonnes of CO2
This property's potential production	2.4 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Changes you could make

▶ Do I need to follow these steps in order?

Typical installation cost	£100 - £350
Typical yearly saving	£62
Potential rating after completing step 1	57 D

## **Step 2: Floor insulation (solid floor)**

Typical installation cost	£4,000 - £6,000
Typical yearly saving	£109
Potential rating after completing steps 1 and 2	62 D

## **Step 3: Hot water cylinder insulation**

Add additional 80 mm jacket to hot water cylinder

Typical installation cost	£15 - £30
Typical yearly saving	£23
Potential rating after completing steps 1 to 3	63 D

## **Step 4: Heating controls (programmer, room thermostat and TRVs)**

Heating controls (programmer, thermostat, TRVs)

Typical installation cost	£350 - £450
Typical yearly saving	£81
Potential rating after completing steps 1 to 4	66 D

## Step 5: Solar water heating

Typical installation cost	£4,000 - £6,000
Typical yearly saving	£130
Potential rating after completing steps 1 to 5	71 C

## Step 6: Solar photovoltaic panels, 2.5 kWp

Typical yearly saving £361

Potential rating after completing steps 1 to 6

82 B

#### Step 7: Wind turbine

Typical installation cost	£15,000 - £25,000
Typical yearly saving	£676

Potential rating after completing steps 1 to 7

#### Help paying for energy improvements

You might be able to get a grant from the Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

## Who to contact about this certificate

## **Contacting the assessor**

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Michael Murphy
Telephone	01792 424569
Email	mike@yces.co.uk

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Elmhurst Energy Systems Ltd
Assessor's ID	EES/014995
Telephone	01455 883 250
Email	enquiries@elmhurstenergy.co.uk

#### About this assessment

Assessor's declaration	No related party
Date of assessment	13 January 2021
Date of certificate	14 January 2021

# Other certificates for this property
