Energy performance certificate (EPC)

Property type Semi-detached house

Total floor area 76 square metres

Rules on letting this property

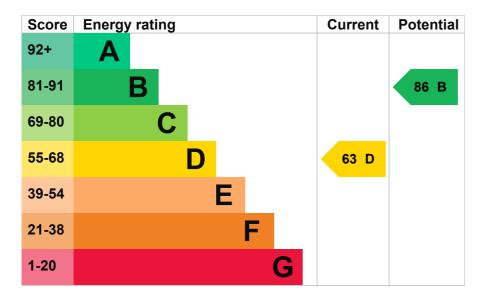

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is D. It has the potential to be B.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- · the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Sandstone or limestone, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, insulated at rafters	Poor
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in 29% of fixed outlets	Average
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 299 kilowatt hours per square metre (kWh/m2).

► About primary energy use

Additional information

Additional information about this property:

· Cavity fill is recommended

How this affects your energy bills

An average household would need to spend £876 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £306 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 13,145 kWh per year for heating
- 1,980 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is D. It has the potential to be B.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

This property produces	4.0 tonnes of CO2
This property's potential production	1.4 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

Typical yearly saving

Typical installation cost Typical yearly saving Potential rating after completing step 1 Step 2: Internal or external wall insulation Typical installation cost Typical yearly saving Potential rating after completing steps 1 and 2 Step 3: Floor insulation (solid floor) Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating	tep 1: Cavity wall insulation	
Typical yearly saving Potential rating after completing step 1 Step 2: Internal or external wall insulation Typical installation cost £4,00 Typical yearly saving Potential rating after completing steps 1 and 2 Step 3: Floor insulation (solid floor) Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Step 4: Low energy lighting steps 1 to 4		
Potential rating after completing step 1 Step 2: Internal or external wall insulation Typical installation cost £4,00 Typical yearly saving Potential rating after completing steps 1 and 2 Step 3: Floor insulation (solid floor) Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	pical installation cost	£500 - £1,500
Step 2: Internal or external wall insulation Typical installation cost £4,00 Typical yearly saving Potential rating after completing steps 1 and 2 Step 3: Floor insulation (solid floor) Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost Typical installation cost £4,0 Step 5: Solar water heating Typical yearly saving Potential rating after completing steps 1 to 5	pical yearly saving	£23
Typical installation cost Typical yearly saving Potential rating after completing steps 1 and 2 Step 3: Floor insulation (solid floor) Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 5	otential rating after completing step 1	64 D
Typical yearly saving Potential rating after completing steps 1 and 2 Step 3: Floor insulation (solid floor) Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	tep 2: Internal or external wall insulation	
Potential rating after completing steps 1 and 2 Step 3: Floor insulation (solid floor) Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	pical installation cost	£4,000 - £14,000
Step 3: Floor insulation (solid floor) Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	pical yearly saving	£182
Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	otential rating after completing steps 1 and 2	71 C
Typical yearly saving Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	tep 3: Floor insulation (solid floor)	
Potential rating after completing steps 1 to 3 Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	pical installation cost	£4,000 - £6,000
Step 4: Low energy lighting Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	pical yearly saving	£32
Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	otential rating after completing steps 1 to 3	73 C
Typical yearly saving Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	tep 4: Low energy lighting	
Potential rating after completing steps 1 to 4 Step 5: Solar water heating Typical installation cost £4,0 Typical yearly saving Potential rating after completing steps 1 to 5	pical installation cost	£25
Step 5: Solar water heating Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 5	pical yearly saving	£44
Typical installation cost Typical yearly saving Potential rating after completing steps 1 to 5	otential rating after completing steps 1 to 4	74 C
Typical yearly saving Potential rating after completing steps 1 to 5	tep 5: Solar water heating	
Potential rating after completing steps 1 to 5	pical installation cost	£4,000 - £6,000
	pical yearly saving	£25
Step 6: Solar photovoltaic panels, 2.5 kWp	otential rating after completing steps 1 to 5	75 C
	tep 6: Solar photovoltaic panels, 2.5 kWp	
Typical installation cost £3,5	pical installation cost	£3,500 - £5,500

£376

Help paying for energy improvements

You might be able to get a grant from the Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Michael Forrest
Telephone	07375040715
Email	mike@forrestsurveys.com

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Stroma Certification Ltd
Assessor's ID	STRO016154
Telephone	0330 124 9660
Email	certification@stroma.com

About this assessment

Assessor's declaration	No related party
Date of assessment	18 April 2023
Date of certificate	18 April 2023
Type of assessment	► <u>RdSAP</u>

Other certificates for this property

If you are aware of previous certificates for this property and they are not listed here, please contact us at mhclg.digital-services@communities.gov.uk or call our helpdesk on 020 3829 0748 (Monday to Friday, 9am to 5pm).

There are no related certificates for this property.
