

# Energy performance certificate (EPC)

9 The Glebe  
Honing  
North Walsham  
NR28 9QR

Energy rating

**D**

Valid until: **14 June 2033**

Certificate number: **2161-9131-1078-1787-1722**

Property type Semi-detached house

Total floor area 88 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

## Energy rating and score

This property's energy rating is D. It has the potential to be C.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

**Properties get a rating from A (best) to G (worst) and a score.** The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D  
the average energy score is 60

| Score | Energy rating | Current     | Potential   |
|-------|---------------|-------------|-------------|
| 92+   | <b>A</b>      |             |             |
| 81-91 | <b>B</b>      |             |             |
| 69-80 | <b>C</b>      |             | 75 <b>C</b> |
| 55-68 | <b>D</b>      | 58 <b>D</b> |             |
| 39-54 | <b>E</b>      |             |             |
| 21-38 | <b>F</b>      |             |             |
| 1-20  | <b>G</b>      |             |             |

# Breakdown of property’s energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property’s age and type. They are used for features the assessor could not inspect.

| Feature              | Description                                 | Rating    |
|----------------------|---------------------------------------------|-----------|
| Wall                 | System built, with internal insulation      | Good      |
| Roof                 | Pitched, 200 mm loft insulation             | Good      |
| Window               | Fully double glazed                         | Good      |
| Main heating         | Air source heat pump, radiators, electric   | Poor      |
| Main heating control | Programmer, TRVs and bypass                 | Average   |
| Hot water            | From main system                            | Poor      |
| Lighting             | Low energy lighting in 89% of fixed outlets | Very good |
| Floor                | Solid, no insulation (assumed)              | N/A       |
| Secondary heating    | None                                        | N/A       |

## Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

- Air source heat pump

## Primary energy use

The primary energy use for this property per year is 247 kilowatt hours per square metre (kWh/m2).

---

## How this affects your energy bills

An average household would need to spend **£2,620 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £434 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

---

## Heating this property

Estimated energy needed in this property is:

- 8,318 kWh per year for heating
  - 2,861 kWh per year for hot water
-

## Impact on the environment

This property's environmental impact rating is D. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year.

### Carbon emissions

An average household produces 6 tonnes of CO<sub>2</sub>

This property produces 3.7 tonnes of CO<sub>2</sub>

This property's potential production 2.1 tonnes of CO<sub>2</sub>

You could improve this property's CO<sub>2</sub> emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

## Steps you could take to save energy

| Step                                                 | Typical installation cost | Typical yearly saving |
|------------------------------------------------------|---------------------------|-----------------------|
| 1. Floor insulation (solid floor)                    | £4,000 - £6,000           | £208                  |
| 2. Add additional 80 mm jacket to hot water cylinder | £15 - £30                 | £31                   |
| 3. Solar water heating                               | £4,000 - £6,000           | £195                  |
| 4. Solar photovoltaic panels                         | £3,500 - £5,500           | £704                  |

- Insulation: [Great British Insulation Scheme \(www.gov.uk/apply-great-british-insulation-scheme\)](http://www.gov.uk/apply-great-british-insulation-scheme)
- Help from your energy supplier: [Energy Company Obligation \(www.gov.uk/energy-company-obligation\)](http://www.gov.uk/energy-company-obligation)

## Who to contact about this certificate

### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

|                 |                                                                                            |
|-----------------|--------------------------------------------------------------------------------------------|
| Assessor's name | Gregory Kowalski                                                                           |
| Telephone       | 08003680242                                                                                |
| Email           | <a href="mailto:epcdepartment@savillshousing.co.uk">epcdepartment@savillshousing.co.uk</a> |

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

|                      |                                                      |
|----------------------|------------------------------------------------------|
| Accreditation scheme | ECMK                                                 |
| Assessor's ID        | ECMK303422                                           |
| Telephone            | 0333 123 1418                                        |
